Online BootCamp Code Academy

10/2021 - 02/2022

Courses

- Front-End Engineer
- Back-End Engineer
- Full-Stack Engineer
- Learn React

SKILLS

HTML

CSS

Python

Tailwind

Django

JavaScript

Git

Flask

React

Nodejs

pytest

PROJECTS

Personal Portfolio (08/2022 - 09/2022)

- This project is dedicated to show case some of my best work.
- <https://cadetheengineer.vercel.app/>

Red Sporting (03/2022 - 05/2022)

- Fullstack online store with streamlined checkout process to facilitate easy browsing and purchasing of items. This was built with **Django, JavaScript**, and **HTML**.
- Implemented features such as product categorization, search functionality, and a streamlined checkout process to facilitate easy browsing and purchasing of items.

Members Only (06/2022 - 08/2022)

- This project deals with developing a Social Media App. It enables users to create or search for specific topics or opinions.
- This project was built using **Django, Javascript, HTML**, and **CSS**. Integrated features such as news feeds to enhance the user experience and facilitate seamless communication and collaboration among users.

Citadel-Messenger (10/2022 - 11/2022)

- FullStack Realtime Chat Messaging App with Authentication Features & SMS Notifications.
- This project was build with **Nodejs, React**, and **Javascript**.

ACHIEVEMENTS

Implemented features resulting in increased user engagement (03/2023 - 04/2023)

Developed and deployed a new feature to an existing software application, resulting in an improvement in the user experience and increase in customer engagement.

Exhibit commitment to learning through attending training and professional development opportunities (01/2023 - 02/2023)

willingness to learn and improve skills through attending company-sponsored trainings and participating in professional development opportunities.
